TIPS
Getting the most from the NYS Trauma-Informed Network

Join us for our next NYS TI Network Quarterly Meeting on July 14th!

WELCOME

TO THE NEW YORK STATE TRAUMA-INFORMED NETWORK

We're here to connect you with other organizations around NYS, bringing you resources and events on a variety of topics that promote trauma-responsive practices.

Our goal is to support champions of trauma responsive practices across the state with improved connection and access to quality resources. Together we can increase the collective understanding of trauma, improve practice, and support resilience throughout New York State.

FOCUS ON: Resilience and Recovery

Focus:

Implementing TIC to Promote Resilience and Recovery

Children who are exposed to traumatic life events are at significant risk for developing serious and long-lasting problems across multiple areas of development. However, children are far more likely to exhibit resilience to childhood trauma when child-serving programs, institutions, and service systems understand the impact of childhood trauma, share common ways to talk and think about trauma, and thoroughly integrate effective practices and policies to address it—an approach often referred to as trauma-informed care (TIC).

TIC is not the sole responsibility or purview of mental health professionals. While evidence-based trauma treatment can play a significant role in the healing process for children who need it, there are many other ways to implement TIC. In fact, every program and service system that touches the lives of children can play an important role.

This brief summarizes current research and promising practices for implementing TIC to support the well-being of children exposed to trauma and help them reach their full potential. The brief begins with an overview of the nature, prevalence, and impact of childhood trauma, followed by a discussion of related risk factors associated with poor child outcomes and protective factors that support resilience. In addition, we present a framework for understanding and implementing trauma-informed care in programs and service systems for children and their families.

Champion's Corner

This month's champion is Bouakham Rosetti, the Senior Project Manager with Care Compass Network (CCN) and the Program Director for the CCN Regional Trauma-Informed Care Network (RTIC) which formed under her leadership in April 2019. Bouakham has accumulated over 12 years of meaningful experiences in; behavioral health and primary care integration, practice transformation, business/provider network development, project management, managed care, and quality incentive metric improvement programs to advance value-based care. Bouakham is passionate about building and improving community health, resilience, Social Determinants of Health (SDoH), and wellness with the goal of advancing health access, education, quality, and patient outcomes. In her role, she has effectively worked with educators, healthcare, community, and clinicians to collaborate, implement, and expand behavioral health/primary care services, trauma-informed care practices, evidence-based training, and community health programs

Bouakham was the lead Project Manager for one of CCN's DRSIP projects, the Integration of Behavioral Health in Primary Care Model 1. Under her guidance and leadership, the project resulted in a high impact outcome for the region. Bouakham is also lead creator and developer of the CCN RTIC Trauma-Informed Care Pilot program and framework which is currently being piloted across multiple care settings.

Bouakham has a Bachelor of Science in Health Services Administration from Ithaca College, a Certificate in Integration of Behavioral Health in Primary Care from The University of Massachusetts Medical School, a Certificate in Practical Change Management from SUNY Corning, and the HANYS Healthcare Executive Leadership Program from Cornell University's SC Johnson Graduate School of Management. She is also certified in Motivational Interviewing and SBIRT from OASAS.

TIPS

Here are some suggestions to help you get the most out of the NYS Trauma-Informed Network. Add a resource, share an event, help us spread the word and drive change in NYS.
